

CHEVROFLEX ULTRA™

Flexible Sign System

Cuts costs, Proven to prevent accidents,
Passively safe to Performance Standard NE3/100 BS EN 12767:2007

Chevroflex Ultra is the next generation of the award-winning Glasdon Chevroflex sign system, which has been in use worldwide for more than 25 years. New Chevroflex Ultra further improves on the market-leading flexible solution:

Certified passively safe to performance standard NE3/100

Chevroflex Ultra exceeds industry standards for motorcycle friendly, passively safe street furniture. In the event of a drive-through collision, Chevroflex Ultra will return to its original shape and continue to function as a statutory sign.

Highly visible wall effect

The large black uprights of Chevroflex Ultra and high visibility reflective border can be seen much earlier than existing metal signs, raising awareness of upcoming hazards.

Brand new socket

Chevroflex Ultra features an all new robust, weather resistant galvanised steel socket that allows damaged uprights to be swapped with minimum fuss. The socket and cover create a seal that prevents debris building up that would inhibit the function of the uprights. A steel locking pin ensures the blades remain firmly fixed when impacted, but are easily removed for replacement or maintenance.

Improved wind performance

Chevroflex Ultra has been extensively wind tunnel tested and proven to remain upright and clearly visible even in very high winds.

New Impactaflex™ Material

New Impactaflex material has been specially developed by Glasdon to offer superior rigidity and resilience combined with class-leading recovery performance after a drive-through collision.

Versatile configuration

Chevroflex Ultra is available in a huge variety of layouts to suit your scheme's requirements. Choice of left hand, right hand or roundabout directional arrows with or without a high-vis border in either 400mm, 600mm or 800mm.

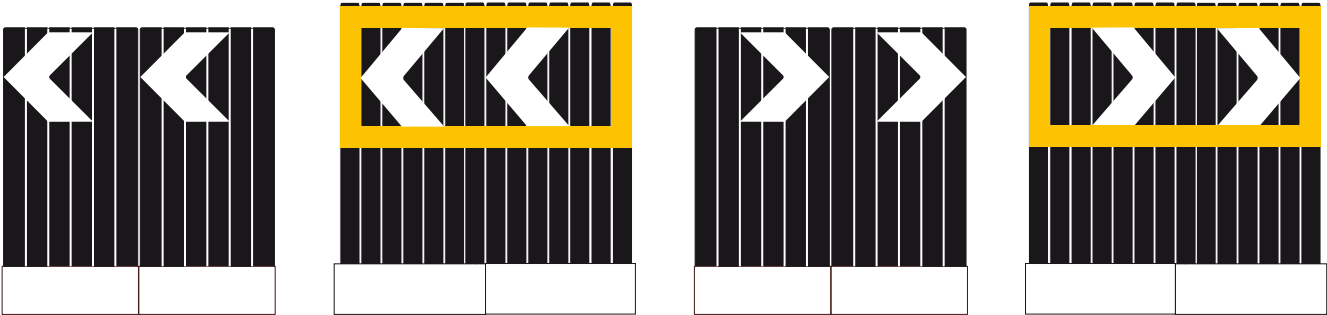

400mm left hand / right hand examples:

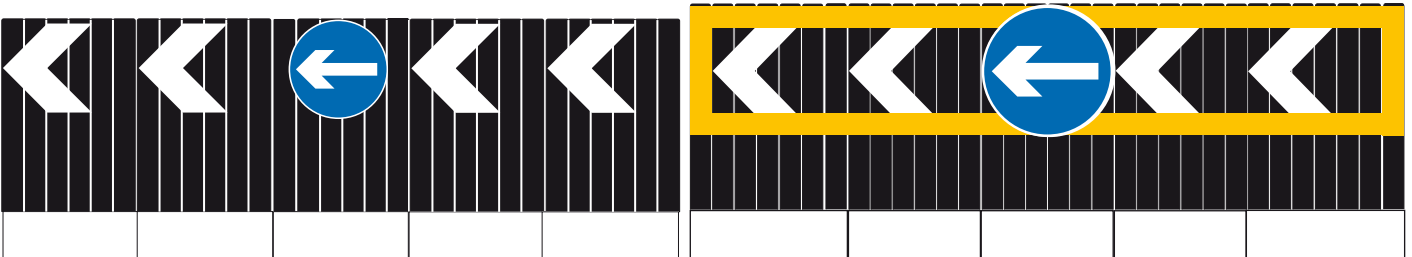

400mm roundabout examples:

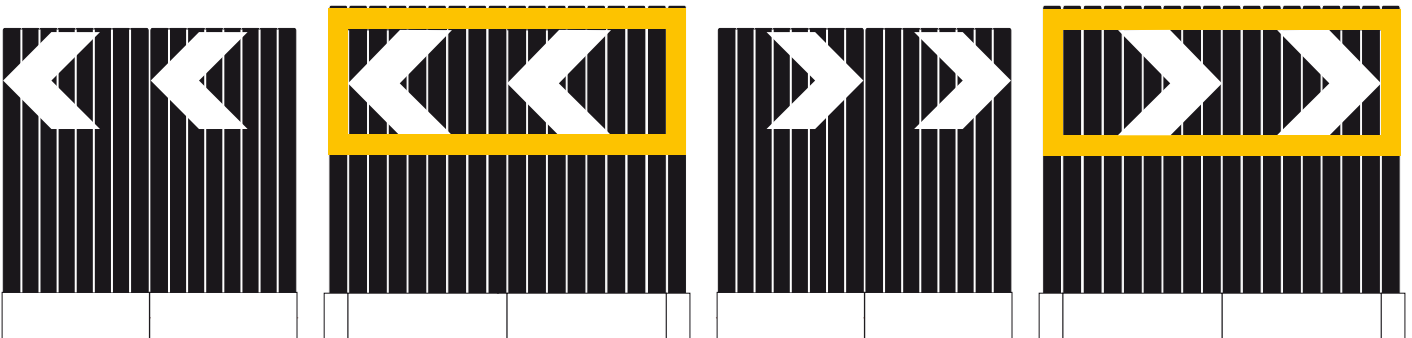

600mm left hand / right hand examples:

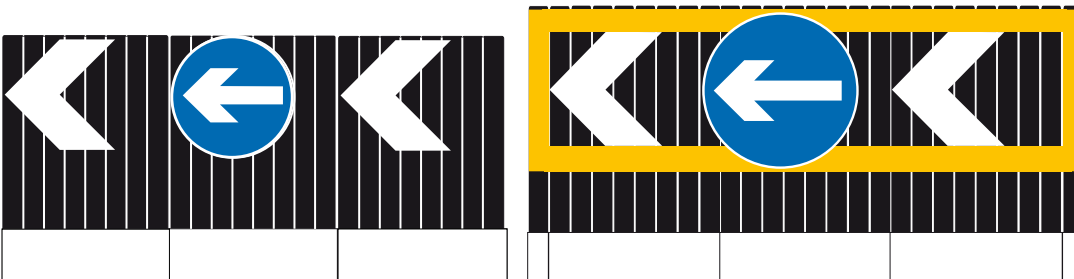

600mm roundabout examples:

800mm left hand / right hand examples:

800mm roundabout examples:

Site inspections available on request.

Other configurations

In addition to standard Chevron configurations, Glasdon clients have successfully implemented Chevroflex Sign System for a wide range of uses, including countdown markers, keep left signage, boundary markings and visibility screens. Please contact our highways sales team on **(01253) 600411** to discuss your project.
